

## TDM - How To configure playlist shuffle

# Introduction

With TDM Digital Signage you have the ability to shuffle the pages within your playlist, this means the pages will be shown randomly. There are two methods of shuffle functions available, one can be found in the playlist configuration and the other can be found in the presentation configuration. With this method you will have more control over all the playlists within your presentation.

This guide will explain how the playlist shuffle can be enabled.

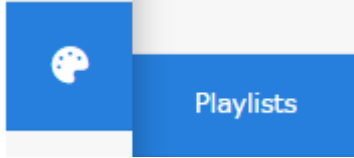

# Requirements

If you want to configure playlist shuffle you need to meet the following requirements:

- Have access to Content Creation > Playlists within the designer

# How To configure playlist shuffle

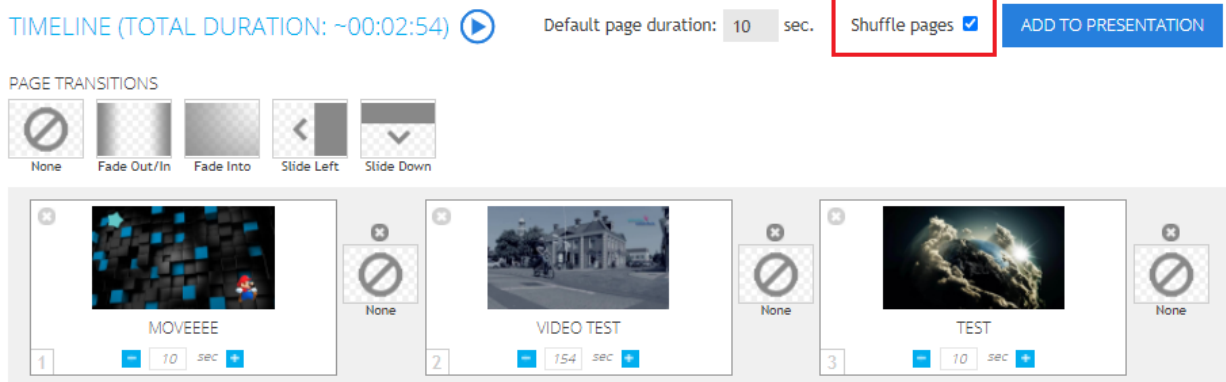

1. Login to the designer: <https://designer.tdm signage.com>
2. Select "Content Creation" and then select "Playlists".

3. Select the playlist where you want to enable "Playlist shuffle".

4. Once you have opened the playlist scroll down until you see the timeline, select the option called "Shuffle pages".

Now you have successfully enabled the playlist shuffle, all the pages within the playlist will now be shown randomly.
