New features

Below an overview of the new features which are part of TDM5.2:

Item:	Function description:
Phone as second display	With the new 'Phone as Second Display' feature, content management just got easier! Use your smartphone as a second screen and see exactly how your content looks on your displays in real-time. No more guessing—test and preview changes instantly, wherever you are. This feature offers more control, speed, and convenience when managing your digital signage.
Reseller portal	<p>Our brand-new Reseller Portal provides all the tools you need to easily manage clients and licenses. Keep complete oversight, manage accounts efficiently, and offer direct support by remotely assisting end users on request. This makes it easier than ever to provide service and strengthen client relationships.</p> <p>For access to the new Reseller Portal, please contact support@tdmsignage.com</p> <p>For more information you can also visit our knowledge base</p>
Advanced scheduling	With the latest expansion of our Scheduling options , you can plan your content even more flexibly and precisely. Set up complex broadcast schedules, manage time-sensitive campaigns, and automate content display down to the finest details. Whether it's daily updates or seasonal promotions, these enhanced planning tools give you full control. Optimize your workflow and plan smarter with the new Scheduling options!
Demo templates	TDM5 now offers a wide range of demo templates for digital signage in various categories. Whether you're looking for sleek corporate designs, dynamic retail promotions, or informative dashboards, our templates give you a flying start! Easily customize them and create professional content in no time.
Video Tutorials	TDM5 is now even easier to use thanks to our new Video Tutorials! Learn step by step how to get the most out of our platform—from basic features to advanced functionalities. The tutorials are easy to find on our YouTube channel and can be accessed directly from the Designer, so you always have the right help at hand. Watch the tutorials and become a TDM5 expert!
Player en Playlist preview	With the new Preview functionality in TDM5, you can now see exactly how your playlists and players will look before going live. Review your content in real-time and easily make adjustments with no surprises. This way, you can always be sure of a perfect display on your screens! Test it now and experience complete control over your content!
Advanced display options	With the latest update of TDM5, you can now control not only when content is shown but also when it should be hidden. Easily schedule specific times or dates to disable certain content, such as outside business hours or after a promotion ends. This way, your screens stay always up-to-date and relevant!
User Groups	Manage users in TDM5 even more efficiently with the new User Groups feature! Create groups and easily assign specific permissions, ensuring everyone has the right level of access. Whether it's administrators or content creators, you control who can do what. Organize your team smarter and work more securely with user groups!

Precautions and restrictions

Below an overview of the precautions and restrictions of TDM5.2:

Component:	Description:	Status:
TDM5 Tizen Player	Application review is currently being handled, once this has been handled the power on/off functionality will become available. All other functionality works as expected by manually installing the Tizen player.	T.B.A.
TDM5 WebOS Player	The TDM5 WebOS player is still in development and will be tested in the upcoming period, more information regarding this will be shared as soon as possible.	T.B.A.
Licensing	License overview on environment dashboard shows wrong data when accessed as reseller. This means the amount of licenses shown could be different than the actual amount of licenses linked to the customer.	Will be solved in the next patch
PC Player	After removing and reinstalling the PC Player software no QR is shown and old device is still linked.	Will be solved in the next patch
